

Hello! I am Molly Finch, and I will be the Age Group Coordinator for the Navigators and Voyagers this summer! I am thrilled to support a camp experience that centers joy, belonging, and meaningful connections for children and their families.

I am lucky to have been a camper at Summer at Latin; I was one of the first Trekkers and later a LIT here at camp! Camp played a formative role in my childhood giving me confidence and independence, but most importantly I made friendships and memories that still stay with me today. These experiences shape what I value most about summer camp: a place where children feel safe to try new things, grow socially and emotionally, and experience the pure joy of being a kid, while families feel trusted, supported, and connected.

I graduated from Rhodes College in Memphis, TN with my BA in Psychology and Concordia University Chicago with my Masters in Early Childhood Education. I have taught in China, New Jersey, and was an assistant here at Latin! I currently work at Lake Forest Country Day School as a lead teacher in their two-year-old classroom, and I serve as the director of their afternoon program for preschool and JK students.

Outside of school, I love to travel, craft, and spend as many days at the pool as possible in the summer. I am so looking forward to the memories we will create together during Summer 2026 and to building a camp environment where children feel celebrated, supported, and excited to come each day.
