

Dear Maker Camp: Sewing Using Tech Campers,

Welcome to Latin's Maker Camp: Sewing Using Tech week! Bring your creative mind with you for our week of sewing and creating! We will explore how technology and sewing can merge together with the use of hand sewing, machine sewing, laser cutting, digital sewing tools, and tools for designing with leather.

We are excited to be your instructors for the week. My name is Fiona Deeney and I have a life-long interest in sewing and technology. During the school year, I teach computer science in the lower school, work on technology integration and the makerspace. My name is Shane Enderle and I am the Innovation Studio Manager at Latin's upper school makerspace. I love learning new skills to make things for myself, friends and family, and sharing those skills with other people.

A few details:

- Dates/Times: June 24-28, 9:00-3:00
- Our group's home base will be in room US-423
- Please email shirt size (include adult or youth) by June 21, 2024
- Arrival and dismissal will be at the upper school building at 59 W. North Blvd.
- Bring a water bottle each day
- Bring your creativity
- All other materials will be provided
- Please send attendance and dismissal changes to summer@latinschool.org

See you soon!

Fiona Deeney and Shane Enderle
