

2021 Season COVID-19 Guidelines **For Campers**

1. Prior to arrival at the San Antonio airport, campers **must** present proof of **one** of the following:
 - a **negative** COVID-19 test within 5 days of departure
 - 14 days of reduced exposure (via Duncan Park Pre-Camp Health Screening)
 - a complete vaccine card
2. Campers who do not provide Duncan Park with this documentation will not be allowed to travel to Duncan Park.
3. All campers will be screened at the airport prior to leaving San Antonio. Staff will be provided with a questionnaire and a no-contact thermometer to screen all participants before departure. Masks **must** be worn at all times from arrival at the airport to arrival at Duncan Park.
4. Masks **must** be worn at all times inside buildings at Duncan Park. The only exceptions are when sleeping, or when doing activities that require the mask to be removed (i.e. brushing teeth, washing face, eating, showering).
5. No more than 2 campers/staff permitted in Bathhouse at one time. Campers will be able to sign up for a designated shower time. The exception to this rule applies at Family Camp, when a family uses the Bathhouse for their shower time.
6. Weather permitting, all meals will be eaten outside. In case of inclement weather, meals will be eaten inside with social distancing provisions.
7. When in public spaces, campers must follow all current local guidelines.
8. Each day of the session, campers will be screened to ensure no symptoms are beginning to show. If campers begin to exhibit symptoms, they will be quarantined until a negative test is reported, or for 10 days. If needed, flights will be rescheduled.
9. If your camper tests positive for COVID-19 after returning home, please notify us **immediately**. All parents from that session will be notified should a camper test positive.
