

## Immunization Waiver

Sunset Lake Camp requires all campers to be current on all Washington State required immunizations. In the event that a parent chooses not to immunize their child, they must sign a statement releasing the camp from any liability due to exposure to any communicable diseases (including any consequences from withholding tetanus immunization should the camper sustain a cut or puncture wound while at camp).

If any communicable disease is found on camp, SSL staff will (as medically necessary) quarantine or isolate any camper with that disease, and notify the parents/guardians as soon as is practically possible.

I, \_\_\_\_\_ (parent/guardian) have chosen not to immunize \_\_\_\_\_ (camper/child), for \_\_\_\_\_ (medical/religious/philosophical) reasons. I release Sunset Lake Camp and any medical personnel chosen by them, from any liability due to exposure to any communicable disease. If my child is found to have any such communicable disease I agree to quarantine/isolation procedures as are medically necessary and to be notified as soon as possible.
