

# HousePaws Vets in Training Program

The illustration shows a blue school building with a red roof and the word 'SCHOOL' on top. To the right is a white mobile veterinary service van with a red and blue light bar on top. A dog and a cat are visible inside the van. The van has 'MOBILE VETS & PETS' written on its side.

Hello MFS Summer Scholars!

We are thrilled to be working with your students this summer and introducing them to the incredible world of veterinary medicine! Dr. Lisa Aumiller started HousePaws Mobile Veterinary Service in 2010 with just one vet bus, a passion for animals, and a dream to make veterinary service more convenient for her clients. Today, HousePaws has over a dozen vets on staff and has several sister companies that cater to the health and well-being of animals. HousePaws Vets in Training Program is the latest expansion to HousePaws Mobile Veterinary Service. This educational program taps into children's innate fascination with animals while empowering them to explore their love of their own pets and the many facets of veterinary medicine.

For students from Pre-K through 12th grade, our scalable curriculum nurtures the bright minds of these students who share our passion. Offering a variety of classes, our goal is to introduce students to the many rewards of animal interaction, to teach them to be responsible pet owners, and to kindle any aspiration they might have to turn their passion into a future career. By embracing the human-animal bond through interaction and education, the HousePaws Vets in Training Program provides hands-on, experience-based veterinary education to each student in the program.

There is nothing that your students need to bring from home for our classes as we bring everything needed with us! There will be live animals present for our classes, if you student has any animal allergies; please make MFS aware of what they are. The older students will be doing organ dissections in several of their classes; however, the organs are all harvested from humanely euthanized animals. We are so excited to explore the world of veterinary medicine and science with your students and watch as they see how incredible it is to be a veterinarian!

Sincerely,

**Rachael Samaroo-Lojek**
