

**Summer Camps
Robotics Day Camps
Summer 2023**

Dear Parents & Families,

As the Director of the Cranbrook Robotics Summer Day Camp, I sincerely thank you and your family for choosing to spend time with us this summer! We are excited to get started with another fun six weeks of learning and making friends while exploring the world of robotics. Regardless of whether your child is an expert programmer/builder/designer or just getting started with robotics, we welcome campers of all levels of familiarity. Our experienced instructors will provide a safe environment for every camper where each child will be encouraged to discover his/her own unique passion for robotics. It is our hope that this experience will spark interest in STEM related fields such as Design, Mechanical Engineering, Computer Science, Electronics, and Coding.

Please feel free to reach out to our office, or to me personally, if you have any questions about the Cranbrook Schools Robotics Day Camp.

Thank you and see you soon!

Katie Bis
