

**Summer Camps
Robotics Day Camps
Summer 2021**

Dear Parents & Guardians,

As the Director of Robotics at Cranbrook Schools, I sincerely thank you for choosing to send your children to the Robotics Day Camp of Cranbrook Schools. We're excited to get started with another fun summer of learning and making friends while exploring the possibilities of robotics. Regardless of whether your child is an expert programmer/builder/designer or just getting started with robotics, we welcome all levels of familiarity. Our experienced instructors will ensure that we provide a safe environment for every camper; an environment in which they can learn and develop passions for the fields within robotics, such as design, mechanical engineering, electronics, and software programming. Please always feel free to reach out to our office, or to me personally, if you have any questions about the Cranbrook Schools Robotics Day Camp.
