

Pod Recycling Pilot Introduction for Campers & Parents:

This summer Camp Kudzu is participating in a pilot program to recycle used Omnipod® Pods.

Through the Pod recycling program, we will be collecting used Pods in special containers throughout our sessions. The collected Pods will be sent to specialized facilities for decontamination and recycling through Insulet's Pod recycling program.

The Pod recycling program is provided by Insulet at no cost to Camp Kudzu. Please note that participation is voluntary, does not affect insulin delivery for any of our campers, and follows all safety protocols.

We know how much campers care about the world around them and are excited to offer this opportunity to reduce the amount of diabetes waste from Camp Kudzu going into landfills this summer.
